

FBD, FBP & FBE SIEVES :**Description :**

This sieve is free from toxic Lead & Tin metals. The edge of the wire mesh is moulded in a Bio safe Toxicology tested polymer.

The moulding makes the sieve a crevice free structure & eliminates the use of additional gaskets.

The wire cloth is stretched to induce tautness & results in a high tensile load bearing mesh. The super taut sieve gives a better throughput, longer life & maintains uniform aperture size.

The sieve is easy to mount, use, wash & maintain.

Coding can be as per user specifications.

The sieve is available with & without reinforcing rings.

**Salient Features :**

- Crevice Free GMP Design
- Super Tight Finish
- Bio safe Toxicology Tested
- Calibrated & Certified as per International Standards.
- Also available in S.S 316 L Quality
- Available in sizes ranging from 200mm dia to 1280mm dia.
- Micronics Mesh sizes available from 125microns to 50microns as per all International Standards.
